

You'll find your truck's parts **replaced by humans.**

While the replacement of your genuine Nissan Diesel parts is handled with clinical speed and precision, you'll find the rest of the human side more, well, human. Our Parts Division and our 57 dealerships are primed as business partners to your operation. Their goal is to keep your truck back on the road with the minimum of bother to you, and to maintain your investment's value. Our low life-cycle cost philosophy is also seen as part of a value-added relationship to assure you peace of mind. With free roadside assistance 24/7 and 365 days a year, you'll find superb service is humanly possible.

Nissan Diesel Parts Technicians: Trained economists.

We really mean it! At Nissan Diesel SA, our low life-cycle cost philosophy is all pervading. That includes our Parts Division and dealerships. Because your truck is an income generator, everything is done to keep your vehicle on the road and always with an eye to overall cost per kilometre. The technical competence of our technicians is a step ahead thanks to our ADI programme, for optimum workshop speed and efficiency. But then, from product to sales, to aftermarket care, every aspect of a Nissan Diesel truck is engineered that way. And that's the genuine article.

Nissan Diesel Replacements. So what's the best part?

Over its entire lifespan, no other manufacturer commits to keeping your truck as affordable and profitable as Nissan Diesel. Genuine replacement parts are no exception. You'd expect each and very original component to be of the finest grade material and tolerances possible, and you'd be right. Logically then, they'd last that much longer, and considering they're guaranteed by NDSA, you can see why they're yet another part of our overriding low, low life-cycle costs philosophy. But then, from product to sales to after market care, every aspect of a Nissan Diesel truck is engineered that way. Genuinely, that's the best part.
